

# SELECT Appli-Stick

## TUTORIAL

### A Variety of Uses

Quilters Select Appli-Stick is a very useful product to have around the sewing/craft room. One side of the web has a fusible coating and is applied to your fabric back. The other side has a light sticky coating, making your fabric repositionable.

Use the Select Appli-Stick tape to assist in the process of inserting a zipper into your project.

**1.** Cut a piece of Appli-Stick 1/4" tape to the desired length and fuse into place with your iron using a medium/high temperature and hold the iron to the tape for at least 3 seconds.

**2.** After the piece has cooled completely, peel the paper strip off exposing a sticky surface.

**3.** Position fabric over the sticky surface of the tape and stitch in place without having to pin, or the fear of shifting.

Appli-Stick is great for projects when applying a ribbon or trim. For ease of sewing the ribbon in the correct location of your project follow the simple steps.

1. Fuse the 1", 1/2" or 1/4 inch tape to the wrong side of ribbon. Once it has cooled completely, peel away paper backing exposing the sticky surface and place ribbon on desired location of fabric.

2. If needed, reposition the ribbon until you have it in the correct location. Fuse using iron to set bond and stitch down with your favorite stitch.

Use Appli-stick 8 1/2 x 11" sheets to simplify your next appliqué process.

1. Trace or use your printer to transfer appliqué design on shiny paper side of appli-stick sheet. Don't forget to mirror the image if necessary. Trim sheet around the design and fuse to the wrong side of your fabric.

2. Once the fused piece has cooled completely, cut design out.

3. Remove paper backing from design and place in desired location of your project, reposition if necessary. Once you are happy with position, press into place with an iron, medium to high temperature, for at least 3 seconds to set bond and sew your favorite stitch for applying appliqué.

A very helpful use of Appli-stick is to hold quilt bindings in place to make stitching a breeze.

1. Line a strip of the 1/4" tape along side the edge of the quilt with the paper side up and fuse into place. Once cooled completely, peel the paper backing off exposing the sticky side of the Appli-Stick.

2. Fold the binding over and position on top of Appli-Stick, remember you can reposition/adjust binding as many times as needed. Once you are happy with placement press again to set the bond. You are now ready to stitch your preferred method of attaching the binding.
