

SELECT Print & Piece TUTORIAL

1. Copy or Print your favorite foundation or paper-piecing pattern directly unto Print & Piece Stabilizer.

2. Cover the numbered sections as directed with your favorite fabrics until the block is complete. (See complete details on foundation piecing under Projects, Square in a Square Quilt Project)

3. Remove the stabilizer: once the stitching is complete, lightly dampen only the stitching lines with a wet sponge or cotton swab - the stabilizer tears away gently without distorting the stitches.
