

QUILTERSSELECT.COM

Product Guide

It all began...

When I ran out of fusible foundation product for my quilt.

I was at my cabin for a quilt retreat and ran out of what I would normally use. I called the local dealer, which wasn't very local in the mountains, and asked if they had my then favorite product. They did not, but before I hung up one of my quilting friends asked "Alex have you tried Floriani Appli-kay Wonder®?" So I ask the local dealer if they had that, and they did have it!

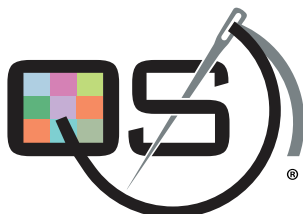

Well in order to finish my project, I had to drive and pick up the Floriani Appli-kay Wonder®. After that weekend I was hooked, but wished it could be a little bit different for quilters; lighter in foundation, and stronger in the fusible.

After awhile I decided to contact Ricky and Kay Brooks, founders of RNK Distributing, and ask them if they had something similar Floriani Appli-kay Wonder®, but with the lighter foundation and stronger fusible for quilters? After talking on the phone for a while, Ricky, Kay, John (my husband), and I met at a Mexican restaurant for dinner, and that is where the Quilters Select Line was born.

We all agreed that the goal of Quilters Select was to bring the best products and tools to quilters all over the world, made specifically for quilters. Most importantly to also have tools for left-handed people, like me!

Design N QUILT™

BRAND NEW!

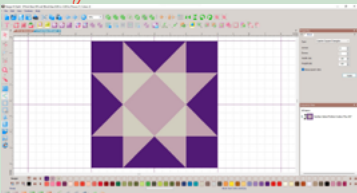

The Most Powerful & Easy-To-Use Quilting Software Ever Made! It's like having Alex Anderson in YOUR Quilt Room!

Inspired by Alex Anderson, Quilters Select's new software is supportive of whatever style of quilting you use! Quilt the way YOU want, while Design N Quilt™ uses industry-first technology that makes designing quilts fast and easy!

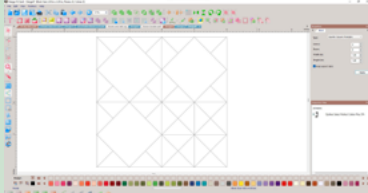

It's as simple as:

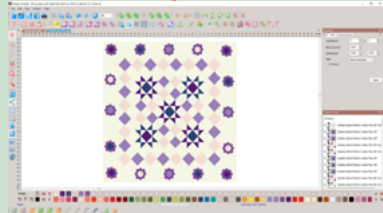

Take Your Idea!

Create Block!

Create Quilt Layout!

For those quilters hesitant to try software, Design N Quilt™ makes it easy and simple! No experience necessary! It's like Alex is there to show them how quick and painless quilt building can be!

Easy Appeal For:

- Traditional Quilters
- Modern Quilters
- Beginner Quilters
- Embroiderers
- Craft Lovers of Any Kind!

Scan Here to find out more about Design N Quilt!

Select Appli-Stick®

This very unique webbing was created especially for simplifying the appliqué process. One side of the web has a fusible coating and is applied the wrong side of your appliqué fabric. The other side has a light sticky coating, making your fabric repositionable! Adjust the placement of your appliqué pieces as many times as you need. Once positioned, fuse into place and add your favorite decorative stitch! This needle-friendly web will not gum up your needle. Use the tape-size version for quilt bindings or decorative trims. The convenient printable sheets make complex appliqué patterns a snap!

Directions for use on printers:

- **ONLY to be used with an ink jet printer, DO NOT USE IN LASER PRINTER.**
- **Load sheets one at a time. Loading multiple sheets may cause the ink jet printer to jam and could damage the printer.**

For appliqué:

- Trace, draw or print the design pieces onto the protective paper sheet of Appli-Stick. (Remember to reverse the image if there is a definite right/wrong or left/right side, such as with lettering.)
- Trim around the image, leaving at least ¼" of the Appli-Stick outside the traced lines.
- Fuse Appli-Stick to the wrong side of decorative fabric, using a medium/high temperature on your iron (no steam) and firm pressure. The fusible side of Appli-Stick is the soft/shiny side.
- Hold the iron in place for at least three seconds, then flip the piece over and press again on the fabric side.
- After the piece has cooled, cut out the appliqué precisely using the traced lines.
- Peel back the protective sheet to expose the sticky surface of the appliqué.
*Tip - Use a pin to score the release paper on smaller detailed pieces!
- Position the appliqué piece on the base fabric or garment - reposition as many times as needed!
- Once all of the pieces are where you want them to be, use your iron to press and set the bond. Use a medium / high iron temperature and hold the iron to the appliqué for at least three seconds. *Press on the appliqué side and the fabric side for maximum bonding.
- Finish by stitching around the appliqué with a satin stitch or your favorite decorative stitch.

Tips from Alex:

- ◇ Always print using an ink-jet, not a laser printer.
- ◇ Remember that the traced image will be reversed once it is transferred onto the paper side of Appli-Stick! Make adjustments to the original image if necessary.
- ◇ All irons heat differently. The iron temperature given above is a starting point. If you find that you are not getting a good fuse, slowly increase your iron temperature until you achieve a good bond. Also, remember to press from both sides of the appliqué and apply pressure with your iron!
- ◇ Test before beginning your project.
- ◇ Use the convenient tape-size rolls of Appli-Stick to easily adhere quilt bindings or bias tape to the edges of quilts and home dec items!
- ◇ Eliminate pinning by fusing this repositionable tape to the back of decorative trims, piping, cording, zippers and more - Appli-Stick holds almost anything in place until you are ready to stitch!
- ◇ Appli-Stick also adheres to paper and wood! Use for scrapbooking, stickers, paper appliqué and more!
- ◇ **For the best bond between Appli-Stick and your appliqué fabric, it is important to remove all starch and sizing by prewashing (no fabric softener).**
- ◇ Be sure to allow the product to cool completely before cutting shapes or moving your project from your ironing surface.

Washer and Dryer Safe:

Cool water and low drying temperature recommended. For delicate fabrics, using a pressing cloth is recommended.

Sizes Available:

QSAS-2025 (20" x 25 YARDS) • QSAS-1210 (12" x 10 YARDS) • QSAS-1X10 (1" x 10 YARDS)

QSAS-HALF (½" x 25 YARDS) • QSAS-QTR (¼" x 25 YARDS) • QSAS-811 (25 PIECES 8½" x 11" PRINTABLE SHEETS)

Select Appli-Web Plus®

Experience ultimate sheer softness with your appliqué projects! Select Appli-Web Plus features an ultra-lightweight fusible webbing backed with heat-resistant paper for tracing your favorite appliqué patterns. The unique flexible nature of the webbing helps maintain the soft hand of the fabric even after fusing – there is no bulk and the bond is permanent! Use for appliqué and many other craft and quilt applications, such as fiber-art, paper appliqué, bonding fabric strips for a decoupage effect, yarn embellishment and more! Needle friendly, ideal for “stacked” and complex appliqué projects. This product will not gum up your needle!

For Appliqué:

- Trace or draw the design pieces onto the protective paper sheet of Appli-Web Plus. (Remember to use the reverse of the image if the image has a defined right/wrong or left/right, such as with lettering.)
- Trim around the image, leaving at least ¼" of the Appli-Web Plus outside the traced lines.
- Fuse Appli-Web Plus to the wrong side of decorative fabric using a **LOW** temperature on your iron (no steam) and firm pressure. The fusible side of Appli-Web Plus is the textured side – hold the iron in place for several seconds until a bond is achieved.
- After the piece has cooled, cut out the appliqué precisely using the traced lines.
- Peel back the protective sheet to expose the fusible surface of the appliqué.
- Position the appliqué piece on the base fabric or garment.
- **Once the appliqué is in place, use your iron to press and set the bond. Use a LOW iron temperature and hold the iron to the appliqué for several seconds. *Press again on the other side for maximum bonding.**
- Finish by stitching around the appliqué with a satin stitch or your favorite decorative stitch if desired.

Tips from Alex:

- ◇ Remember the traced image will be reversed once it is transferred onto the paper side of Appli-Web Plus! Make adjustments to the original image if necessary.
- ◇ **For the best bond between Appli-Stick and your appliqué fabric, it is important to remove all starch and sizing by prewashing (no fabric softener).**
- ◇ All irons heat differently. The iron temperature given above is a starting point. If you find that you are not getting a good fuse, slowly increase your iron temperature until you achieve a good bond. Also, remember to press from both sides of the appliqué and apply pressure with your iron! Test before beginning your project!
- ◇ Use the convenient tape-size rolls of Appli-Web Plus to easily adhere quilt bindings or bias tape to the edges of quilts and home decor items! Eliminate pinning by fusing this tape to the back of ribbons, decorative trims, piping, cording, zippers and more – Appli-Web Plus holds almost anything in place until you are ready to embellish!
- ◇ Won't show through shear/open lace trims.
- ◇ The unique, flexible nature of this webbing makes it great for appliqués on T-Shirts and other stretchy materials.
- ◇ Test before beginning your project!
- ◇ Washer and Dryer Safe: Cool water and low drying temperature recommended. For delicate fabrics, using a pressing cloth is recommended.

Select Print and Piece®

Give your foundation-pieced quilts the fiber they deserve with Select Print & Piece printable sheets! Unlike a paper foundation, Select Print & Piece is a fiber-based product that does not perforate while stitching. It supports detailed patterns, even when you have to remove stitches to start over! Bonus feature! This unique foundation is partially water-soluble; when the time comes to remove the foundation, **simply dampen the stitching lines** and it removes easily without distorting stitches!

Directions for Use and Care

For foundation (paper) piecing:

- If possible, set your printer's paper feed settings to "Decorative or Heavy Paper." If your printer does not have this setting, load only one sheet of Print & Piece at a time.
- Copy or print your favorite foundation or paper-piecing pattern directly onto Print & Piece.
- Cover the numbered sections as directed with your favorite fabrics until the block is complete.
- Remove the foundation: once the stitching is complete, lightly dampen **only** the stitching **lines** with a wet sponge or cotton swab – the Print & Piece tears away gently without distorting the stitches! A very light fiber web will be left behind in the stitches. This will continue to provide support to your stitches without adding bulk to your project.
- Alternately you can leave the Print & Piece within the block completely. When the quilt is laundered, the water-soluble fibers will dissolve and the non-soluble fibers will leave behind a very subtle loft. Create a test block with this method before applying it to an entire quilt to make sure you are happy with the results!

For stabilizing decorative or satin stitches:

- Place one layer of Print & Piece directly under fabric and stitch.
- To remove the foundation, lightly dampen **only** the stitching with a sponge or cotton swab – the foundation will pull away without distorting even the most delicate heirloom stitches!

Washer and Dryer Safe

Cool water and low drying temperature recommended.

Press using a medium setting on your iron.

A very light fiber web will be left behind in the stitches. This will continue to provide support to your stitches without adding bulk to your project.

Size Available:

QSPP-811 (25 PIECES 8½" x 11" PRINTABLE SHEETS)

Select Print and Piece Fuse Lite®

There are so many uses for this versatile product! It's ideal for needle-turn appliqué patterns, and the sheerness makes tracing a snap. The 8½" x 11" pre-cut sheets are perfect for printing complex patterns with an ink jet printer. The fiber-based foundation gives solid yet soft support for detailed machine embellishments, including bold satin and heavy decorative stitches. The temporary fuse keeps fabrics from shifting or pulling while stitching or embellishing. The fibers of Select Print & Piece Fuse Lite are partially water-soluble; simply dampen the stitching lines and they remove easily without distorting stitches!

Directions for use on printers:

- **ONLY to be used with an ink jet printer, DO NOT USE IN LASER PRINTER.**
- **Load sheets one at a time. Loading multiple sheets may cause the ink jet printer to jam and could damage the printer.**

Directions for general use as a foundation for embellishment:

- Heat iron to silk setting (low).
- Position the fusible side of Print & Piece Fuse Lite over the wrong side of the fabric.
- Cover the foundation with a cotton pressing cloth or piece of muslin. It is also OK to press from the fabric side instead of the stabilizer side*
- Press with the iron with an up-and-down motion, not side-to-side. If a bond is not achieved, slightly increase your iron temperature and try again**
- Once stitching is complete, slightly dampen the stitching line and pull away the foundation.

*Remember that all irons heat differently. We recommend testing on scrap fabric before beginning your project.

**The fusible coating on Print & Piece Fuse Lite was designed to be temporary. If the iron temperature used is too hot, the bond may become permanent.

Directions for needle turn appliqué:

- Print or trace the image on to the ink-jet printer only non-fusible side of the foundation.
- Trim away the excess foundation by cutting directly on the lines.
- Fuse the foundation/image onto the wrong side of the fabric being used for the appliqué.
- Trim the fabric to within a generous ¼" of the foundation/image.
- Use a fabric-safe glue stick and lightly coat the edge of the foundation/image. (Try our QS glue stick!)
- Fold the fabric edges so they stick to the glue.
- The appliqué is now ready to be stitched into place on your project!
- There is no need to remove the foundation from behind the appliqué: when washed, half of the fibers will dissolve; the other fibers will create a slight loft under the appliqué.

Washer and Dryer Safe

Cool water and low drying temperature recommended. Press using a medium setting on your iron.

Size Available:

QSPFPL-2010 (20" X 10 YARDS)

**QSPFPL-811 (25 pieces 8½" x 11"
PRINTABLE SHEETS)**

Select Fabric Prep®

When our projects involve using fine fabrics, such as silk, satin, Dupioni, linen blends or light cottons, you know they can be very rewarding, but can also present challenges. Experiences such as fraying, runs, puckering, distortion and more can quickly ruin a project! Select Fabric Prep was created for helping us tackle these fabric challenges. This ultralightweight interlining will permanently fuse to the fabric back, offering needed support without adding bulk. The soft woven texture blends beautifully with most luxurious fabrics and will not change their drape or hand!

Fusing Select Fabric Prep:

- Cut a piece of Select Fabric Prep at least one inch larger than the fabric in all directions.
- Place the fusible side (rough side) to the wrong side of the fabric.
- Press using a low temperature (silk setting) dry iron. Using a pressing cloth or sheet between the iron and the interfacing is highly recommended.
- Once cooled, trim the excess Select Fabric Prep away and square the fabric as needed.

Tips from Alex:

- ◇ All irons heat differently. The iron temperature given above is a starting point. It is always good to start with a lower temperature on your iron, slowly increase the temperature until you achieve a good bond. Test before beginning your project!
- ◇ During the fusing process, remember to press by picking up and setting down your iron to the next area to be fused. For best results don't rub your iron side to side on the fabric.
- ◇ Another great use for Select Fabric Prep is to cover scratchy stitches on the backside of embroidery designs or emblems. This is especially nice for baby garments, youth apparel or golf shirts.
- ◇ Use to keep unruly fabric from fraying or shredding during the construction of a project, embroidery or stitching process.
- ◇ Can be fused to the back of quilt blocks before squaring up to prevent warping or stretching. Can also be fused to the wrong side of fabrics before cutting and piecing to prevent stretching on bias edging.
- ◇ Washer, Dryer and Dry-Clean Friendly.

Size Available:

QSFP-3025 (30" x 25 YARDS)

QSFP-303 (30" x 3 YARDS)

Select TearAway®

Give your decorative stitching the perfect foundation with Select TearAway. This ultra-lightweight tear-away foundation has enough body to support dense satin stitch appliqué, yet is easily removed from your lightest stitching and is perfect for heirloom sewing. The temporary fusible coating will secure the fibers of your fabric eliminating puckering or distortion.

Directions for Use and Care

To stabilize for satin stitching or appliqué:

- Cut a piece of Select TearAway slightly larger than the area to be stitched or embellished.
- Place the shiny side of the tearaway to the wrong side of the fabric.
- Cover the tearaway with a pressing cloth or piece of cotton.
- Using a medium setting (wool) on your iron, press into place.
- Let the foundation become cool.
- Stitch or embellish as desired.
- Once stitching is complete, gently tear away the excess foundation.

Washer and Dryer Safe

Cool water and low drying temperature recommended.

Press using a low to medium setting on your iron and press cloth. Do not touch the iron directly to the tearaway.

Size Available:

QST-1510 (15" x 10 YARDS)

QST-2010 (20" X 10 YARDS)

Select Cutaway®

Experience sheer, soft and non-stretch stability with this ultra-light-weight cutaway. The temporary fusible coating creates a necessary bond to prevent fabrics from stretching or distorting. Use for stabilizing T-Shirt Quilts, bias cut pieces or simply to keep blocks from moving while adding sashing or borders. Another use for this super soft foundation is to create flawless turned edge appliqué with sealed edges – check out our project web page to learn this super technique!

Directions for Use and Care

For stabilizing a T-shirt quilt block:

- Cut Select Cutaway at least one inch larger than the T-shirt block.
- Place the fusible side of Select Cutaway to the wrong side of the block.
- Cover the Select Cutaway with a pressing cloth or piece of cotton.
- Press using a **LOW** iron temperature (silk/wool).
- Square the block by trimming away the excess Cutaway.

For stabilizing appliqué on knit:

- Cut Select Cutaway at least one inch larger than the size of the appliqué.
- Place the fusible side of Select Cutaway to the wrong side of the fabric or garment. *If the design is dense or large, place a second layer at a 45-degree angle, directly over the first piece.
- Cover the Select Cutaway with a pressing cloth or piece of cotton.
- Press using a **LOW** iron temperature (silk/wool).
- Complete stitching process.
- Once the appliqué is complete, pull the cutaway foundation back to the design and trim away the excess. It may be necessary to reheat the cutaway in order for it to release from the fabric.

Washer and Dryer Safe

Cool water and **LOW** drying temperature recommended.

Press using a low to medium setting on your iron and use a press cloth. Do not touch the iron directly to the Select Cutaway. All irons heat differently! Start with a **LOW** temperature and slightly increase until a good bond is set.

Do not use a HIGH iron temperature.

Size Available:

QSC-1510 (15" x 10 YARDS)

QSC-2010 (20" X 10 YARDS)

Select Perfect Cotton Batting®

Select Perfect Cotton Batting is made with 100% long staple cotton, no chemicals and no bleaching. This incredibly soft, high quality batting features a light scrim (foundation) which helps to control stretching and movement during quilting and embellishing. Hand or machine quilters can stitch without fear of distortion. The 100% cotton fibers have been needle punched offering a smooth loft and superior support for your project! Ideal for hand or machine quilters.

Directions for Use and Care

- Always do a test piece in advance to become comfortable with using this batting.
- It is recommended to pre-wash this batting prior to use. Hand wash and dry naturally using cool water and a mild detergent, soak for 15 minutes. Squeeze out the excess moisture by rolling in a dry towel. Lay the piece flat and let it dry naturally.
- If you prefer not to pre-wash your batting, laundering your completed quilt using a delicate cycle, cool, water, and mild detergent is recommended.
- Let the quilt dry flat and naturally for best results. A slightly textured look will be the result.
- Machine or hand quilt up to 8½" apart.
- Because of the natural fibers within this batting, expect up to 3-5% shrinkage.

Size Available:

QSPC2-KING (122" X 122")

QSPC2-QUEEN (93" X 116")

QSPC2-FULL (93" X 100")

QSPC2-TWIN (76" X 93")

QSPC2-12220 (BY THE YARD 122" X 20 YARDS)

Alex's Note:

This supple low loft batting quilts up beautifully by hand or machine.

Select Soft Blend Batting®

Select Soft Blend Batting was created for machine or hand quilters who want to quilt and embellish without fear of distortion. This durable, yet soft batting features a light scrim (foundation) which helps to control stretching and movement during quilting and embellishing. This unique blend of cotton and polyester fibers has been needle punched offering superior support for your project! This quality batting has a smooth loft, with less resistance making it ideal for hand or machine quilters.

Directions for Use and Care

- Always do a test piece in advance to become comfortable with using this batting.
- It is recommended to pre-wash this batting prior to use. Hand wash using cool water and a mild detergent, soak for 15 minutes. Squeeze out the excess moisture by rolling in a dry towel. Lay the piece flat and let it dry naturally.
- If pre-washing your batting is not desired, it is recommended to launder your completed quilt using the delicate cycle, cool water and a mild detergent. Let the quilt dry flat and naturally for best results. A slightly textured effect will be the result.
- Machine or hand quilt up to 8½" apart.
- Because of the natural fibers within this batting, expect up to 3-5% shrinkage.

Size Available:

QSBB2-KING (122" X 122")

QSBB2-QUEEN (93" X 116")

QSBB2-FULL (93" X 100")

QSBB2-TWIN (76" X 93")

QSBB2-12220 (BY THE YARD 122" X 20 YARDS)

Alex's Note:

This batting is made up of 80% cotton, 20% polyester fibers. This mix of fibers means you get the soft luxury of cotton with the added durability of polyester making this batting perfect for very large quilts or projects that may experience a good amount of wear and tear, like baby, lap quilts, home dec items, or wearables.

Select Soft Wool Batting®

Select Soft Wool batting gives quilters the ultimate in insulation and warmth yet is lightweight and breathable. This 100% wool batting has natural moisture-wicking properties, and resists bearding and fiber migration. Hand quilters will fall in love with the easy feel and texture as they guide their needle through the lofty fiber, and machine quilters will love the gentle loft. Quilt up to 4" apart; 0-3% shrinkage.

Add a layer of Select Soft Wool Batting to your cotton or blend batting for extra loft without adding a lot of extra weight.

Select Soft Wool batting is a great choice for trapunto quilting! It will fill out your trapunto designs without adding bulk and weight to your project.

Sizes Available:

QSSW-961 (96" x 1 YARD)

QSSW-12020 (BY THE YARD 120" X 20 YARDS)

Alex's Note:

Wool is an amazing fiber! It will keep you warm in the winter but is light and breathable making it an excellent choice for all climates.

Quilters Select® Rulers

Select Quilting Ruler - 2.5" x 36"

From Quilters Select, the makers of the REAL Non-Slip Rulers, comes your help to line up the big quilts! Use it for cutting binding strips, especially along the bias. Square up edges with less tiresome repositioning as you go along the borders!

QS-RUL2.5X36

Like all Quilters Select Rulers, it has:

- Unique Non-Slip coating for accurate cutting!
- Easy to read lines for marking and measuring your fabric!
- Made for ambidextrous use – numbers go left-to-right and right-to-left!

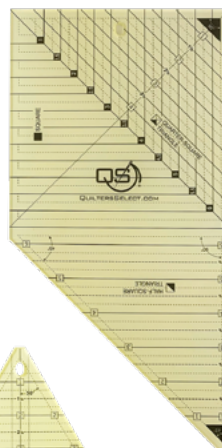

3N1 Square And Triangle Combo Ruler

Your Ultimate tool for cutting half-square & quarter-square triangle units, plus basic squares up to 6½".

Eliminate the tedious math associated with traditional half and quarter square triangle units.

QS-TRISQU

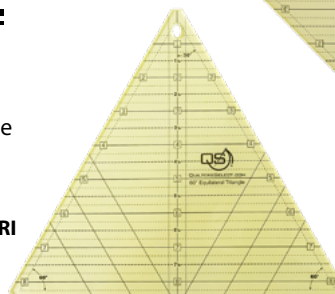

60 Degree Triangle Ruler

This 8.5" Ruler makes any pattern that requires 60-degree shapes into simple and smooth cutting!

QS-60TRI

Select Quilting Ruler Rack and Organizer

Organize your quilting rulers and tools with this Ruler Rack & Organizer! Each rack is solid wood with a rustic paint finish, making it a quaint addition to any quilting table! Includes 8 or 10 grooves made for either 3mm or 6mm widths of our Non-Slip Quilting Rulers, with two trays on either side for tools, notions, and whatever else you need close at hand while quilting!

QS-RULRACK3
QS-RULRACK6

Select Quilting Rulers

- Easy to read lines for marking and measuring your fabric - $\frac{1}{8}$ ", $\frac{1}{4}$ ", $\frac{1}{2}$ " $\frac{3}{4}$ " and 1" markings as well as multiple angles.
- Unique non-slip coating makes for more accurate cutting. No more accidental cuts and squaring your blocks has never been easier!
- One-inch lines with two sets of corresponding numbers are placed around the perimeter of the ruler and read left to right and right to left – never lose your place or have to count backwards!
- This rulers feature exact measurements around the perimeter – no more accidental cuts, and squaring your blocks has never been easier!

Quilters Select® Notions

Select Free Fuse

Creating a semi-permanent bond between most fabrics, battings and textiles, this powder-like bonding agent is needle friendly!

Sprinkle QS-Free Fuse over the base material, place the second piece of fabric over the top of the powdered surface, cover with parchment paper or a Teflon pressing sheet, apply direct heat and pressure with an iron or press (medium temperature) – hold for at least 4 seconds, the bond is now set!

Use for creating fusible quilt batting, fusible foundations, fabric to fabric – appliques, costumes, quilting, home dec and more!

QS-FF2OZ (FREE FUSE POWDER WITH DISPENSER TUBE 2oz.)

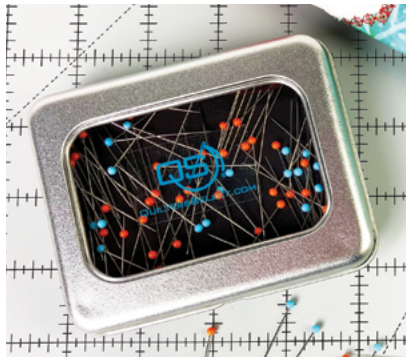

QS-FFPOWDER (REFILL NO CONTAINER)

Select Pin Tin

Contains 100 Glass Head Pins

Designed to pierce through delicate fabrics!
Heat Resistant -Safe for use with irons!

Convenient Metal Case:

- Window
- Lid
- Magnet

QS-PINTIN

Stitch N Glide

Eliminate friction between fabric and machine with Quilters Select Stitch N Glide sheet. Place "grip side down" on bed of machine. Special grip surface clings without leaving adhesive residue. Sheet may be cut to expose feed teeth or bobbin area if desired.

- Free-motion Quilting
- Thread painting
- Reusable

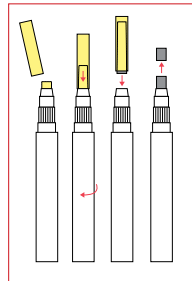

Quilters Select® Notions

Select Fabric Glue Stick with Refill

Specially formulated for fabrics, Select Fabric Glue Sticks are a quick, convenient and effective way to hold your projects during sewing, quilting and appliqué. The glue applies yellow and then dries clear, creating a temporary bond while the fabric remains pliable. Simple to use without the hassle of pin holes.

Directions for Use:

- To extend glue stick, hold the fluted grip and turn the barrel clockwise.
- Lightly press the glue stick to edge of fabric and guide along length.
- Press down the top fabric to adhere the two pieces.
- Always replace cap to avoid the glue stick drying out.
- See illustrations below for inserting refills.
- This product will not gum up your needle!

QS-GRY: FABRIC GLUE STICK WITH 1 REFILL

QS-GSY: PACK OF 4 REFILLS

REMINDER:

This glue dries fast, so it holds your pieces in place right away! Be sure to replace the lid after every application to keep the glue stick from drying out.

Select Self Erase Marker

2-in-1 Precision Tip Fabric Marker with Eraser!

- Precision tip marker on one end with wide slant eraser on the other.
- For quilting, decorative embroidery, handicraft, dressmaking and more!
- Markings disappear automatically after 1-7 days, this may vary with material and surrounding such as temperature, humidity and air circulation.
- Use on-board eraser for immediate removal.
- You need to test the mark & ironing it on all fabrics before you do final project.
- After marking, if it needs to be heated/ironed, treat with clean water to prevent discoloration.

QS-SEM

Select Self Eraser

Use this fine point eraser for the immediate removal of ink from fabrics when using our Self-Erase Marker!

QS-SEM

Quilters Select® Notions

Select Wave Appliqué Scissors

The Wave Appliqué Scissors' precision double point makes work of cutting tight angles and corners easier! This duckbill-styled scissor has German Grade Stainless steel blades and a wave design that separates and lifts fabric that is cut away while guarding your base fabric!

It also comes in a left-handed edition, which has the blade placement specifically designed for left-handers – like Alex Anderson herself!

Both versions use a super slim .05" width blade, with larger finger holes of ease and comfort.

QSTOOL1 (RIGHT HANDED)

QSTOOL1-L (LEFT HANDED)

Select Ruler Handle

- Helps move and position your ruler so you can accurately mark and cut your materials, while adjusting on the fly.
- Designed for ambidextrous use.
- The suction cup can be easily released from surfaces by lifting up the small tab on the soft plastic edge.
- Use two handles for large rulers!
- Can be used on nearly all quilting rulers!

QS HANDLE

Quilters Select® Notions

Select Quilting Clips

This pack of 36 plastic clips in alternating blue and red are ideal for binding, hemming of quilts, handbags and other craft projects! Perfect for gripping multi-layer fabrics firmly and securely. Just clip and hold, then start quilting!

QS-CLIPS

Accu Grip Quilting Gloves

- Grip your fabric with a non-slip silicone palm!
- Fingerless design allows delicate threading and tool use without taking the glove off!
- Control your fabric for accurate free motion quilting every time!

QS-GLOVE

Shears

This shear's extra-long blades are made for smooth and precise cutting, allowing you to cut the most delicate fabrics cleanly and without snagging. The enlarged handle is designed for unisex use and comfort, so anyone and everyone can become an expert cosplayer, quilter or seamstress! You will never have to struggle with cutting unstable or delicate fabrics ever again. Our Quilters Select Shears are the perfect addition to your creative arsenal

QS-SHEAR

Semi-Precious Stones!

Inspired by the beauty of semi-precious stones, these sewing room necessities are as lovely as they are practical. Color coordinate your creativity with a set of matching stone Jewel Tools or collect all three colors ways to mix and match.

Stone Pin Cushion

- Keep your pins close with an attractive pin cushion, centered with a unique semi-precious stone
- The adjustable strap fits easily on the wrist.
- Available in a variety of colors and stones, they're the perfect quilting, sewing, and crafting accessory.

QS-PCRQ
(Rose)
QS-PCSD
(Sodalite)
QS-PCTQ
(Turquoise)

Stone Seam Press

- The stone encased cold resin handle ensures a smooth grip!
- Keep fingers safe from steam or high heat.
- Hold seams in place while stitching!
- Available in different stone types! Collect them all!
